

Education

Postech (Feb 2021 ~ Present)	Bachelor's degree expected in Computer Science and Engineering, Pohang, Korea • Current GPA 3.79/4.3
RWTH Aachen (Sep 2024 to Feb 2025)	Exchange student in Computer Science and Engineering, Aachen, Germany

Work Experience

Undergraduate research (Dec 2022 to Feb 2023)	HIS(Human-centered Intelligent Systems) lab , Pohang, Korea • Empathy System Development project - Conducting research involving the collection of biosignals and emotion data, utilizing AI models for direct analysis. - Increasing understanding of users and developing a heightened interest in human-centered research. - Aspiring to address communication and conflict issues among humans through computer science. - Developing a dream to conduct research that solves problems in contemporary society, aiming to positively impact people's lives.
SES Intern (Jul 2023 to Aug 2023)	Network dept. Security part S/W, Samsung DX , Suwon, Korea • Security Vulnerability Inspection project - Developed a Python tool for automated CVE-based vulnerability inspection. - Analyzed security datasets and contributed to innovation projects (e.g., Creathon). - Getting advice on my work and career through exchanges with mentors
Undergraduate research (Jan 2024 to Feb 2024)	Computer Vision (CV) lab , Pohang, Korea • Focus on Computer Vision study - Core Studies Studied RNN, CNN, Attention Mechanisms, Transformers - Transfer Learning Project Developed Pytorch code and evaluated transfer strategies LP, FT, LP-FT Optimized hyperparameters for improved training outcomes

Research Project (Feb 2024 to Jun 2024)	Computer Vision (CV) lab, Pohang, Korea • Next action anticipation using Diffusion Models - Proposed a next action anticipation model using diffusion frameworks for iterative refinement. - Integrated Future Transformer (FUTR) with diffusion models to enhance accuracy. - Improved action prediction through iterative denoising with DDIM sampling.
Undergraduate Research (Jun 2024 to Aug 2024)	EFFL (Efficient Learning) lab, Pohang, Korea - Studied multimodal models (CLIP, LLaVA, ViLA, MM1) through research papers. - Explored the development of a small-scale CLIP model.
Research Project (Feb 2025 ~ Present)	Medical Information Processing (MIP) lab, Pohang, Korea • Multi-modal AI Model for Pulmonary Edema Classification with Chest X-ray and Clinical Biomarkers - Developed a multi-modal AI model using contrastive learning to align CXR and lab data. - Implemented modality-specific encoders and trained the classification model. - Exploring fusion strategies for better modality integration. - Started with an interest in multimodal AI and its applications in the medical field.

Honors and Rewards

2022 UGRP(Undergraduate Group Research Program)

- "Development of an Exercise Posture Correction Application using ML Kit.
 - Won the Excellence Award
 - Developed a user-friendly app using Android Studio and Flutter, optimizing UI for different age groups.
 - Gained valuable experience in communication, teamwork, and problem-solving skill.
 - Developed an interest in project planning and conceptualization.

GLP(Global Leadership Program), Sep 2022

- Global Leadership Program scholarship in Postech CSE

18th Kwanjeong Undergraduate Scholarship Recipient, 2023-1 to 2024-2

- Foundation to support students who want to contribute to national development and human co-prosperity

Additional Informations

PAIS, Postech, 2023-2

- Studying the thesis in the field of NLP as a member of the nlp team of PAIS
- Reviewing about GPT paper “Improving Language Understanding by Generative Pre-Training”.

CS224n study, YEHS, 2023-2

- Interested in LLM and participating in the study
- Networking with YEHS members led to participation

YEHS 265th, NAEK, Jan 2023 ~ Present

- Young Engineers Honor Society
- Engaged in activities such as major information sessions for high school students
- Regular seminars for academic exchange, targeting the enhancement of scholarly interactions.

Poapper, Postech, 2021~2

- To accumulate development experience, attended seminars on backend, frontend.
- Acquired knowledge of Node.js and JavaScript.
- Subsequently, developed more interest and studied more (Django, git etc.) through online courses and books.

Poscat, Postech, 2022~ Present

- Studying algorithms and AI through team-based studies and seminars.
- Participated in PPC and prepared through team study sessions with fellow teammates.

Extracurricular Experience

MSSA (Management Strategy Student Association), Postech, 2021

- Since companies are at the center of the flow of economy and finance, I decided to develop basic capabilities in various fields and joined MSSA.
- Study management-oriented theory by team study or seminars.
- Internal session, which presents management strategies, held under the theme of "MS Teams' Growth Strategy."

2024 Nobel Week Delegate, Stockholm, Sweden, 2024

- Selected as a university representative to attend the Nobel Week.
- Attended lectures and panel discussions by Nobel Laureates.
- Participated in networking events with partner universities, research institutes, and alumni.

Qualification

OPIc writing IH(Intermediate High)

Sep 4 2022

OPIc speaking IH(Intermediate High)

Sep 4 2022
